

Data Erasure Integration with Microsoft Active Directory

Minimizing exposure to data breaches—and the consequences they bring—is an important step for your organization. But getting unnecessary data erased permanently can be a challenge.

Why Blanco

As the de facto standard in data erasure, Blanco provides thousands of organizations with an absolute line of defense against costly security breaches, as well as verification of regulatory compliance through a 100% tamper-proof audit trail. Our data erasure solutions have been tested, certified, approved and recommended by 18 governing bodies around the world. No other security firm can boast this level of compliance with the most rigorous requirements set by government agencies, legal authorities and independent testing laboratories.

[View Our Certifications](#)

Backed by the testing and certification of Common Criteria, Blanco File enables your organization to selectively erase data on active PCs, laptops and servers through automation of data erasure routines to ensure full compliance and enhanced data security.

Adding another standalone piece of software into your IT environment is hard to justify - unless it can be deployed and managed centrally. With Blanco File you can use your existing Active Directory management of your users and their privileges to deploy MSI packages for "silent installations" onto any machine, enforcing data retention policies and maintain compliance with a comprehensive audit trail.

Key Benefits

Easy Configuration and Rule Creation

- Configure your internal and external data retention policies into automated and scripted rules.
- Achieve compliance among national and international regulatory bodies including PCI DDS, HIPAA, EU GDPR, ISO 27001, ISO 27040 and other data security regulations.

Securely Erase Data on Active Devices

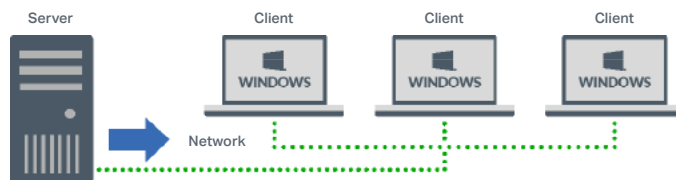

- Automate targeted erasure on specific files/folders throughout your IT environment to eliminate the of disclosure sensitive data. Because this is meant for active devices, you avoid system downtime during the erasure process.

Safely Monitor and Report on all Erasure Activity

- Validate compliance among national and international regulatory bodies through advanced reporting features to ensure a tamper-proof audit trail.

Remote Installation and Deployment

- Save time and resources with easy installation into existing systems with remote installation and deployment. Take advantage of task automation capabilities to schedule erasure routines to advance your data hygiene.

MSI deployment through the network for "silent installations".

Configurations and rules for Blanco File can also be sent and enforced!

Blanco File allows you to reduce system complexity, simplify management, and streamline the enforcement of your data retention policies. This leads to heightened data security, audit compliance and increased productivity across your IT team and end users.

Technical Specifications

AUTOMATION & SCHEDULING		INSTALLATION & USER MANAGEMENT	
<ul style="list-style-type: none"> Schedule erasure of selected files on local or remote servers and work stations Implement rules and automatic routines to erase files and folders Enable policy-based scheduling and integration through Windows standard components Improve user interaction with multiple configuration alternatives available 		<ul style="list-style-type: none"> Easy installation on PCs and servers (both physical and virtual machines) Remote installation and deployment available through MSI package Central configuration of clients and multiple installations through group policy files Easy-to-use Windows GUI and advanced command line interface supporting multiple parameters for full flexibility of integration Can be run from a standalone USB stick when plugged into a computer or server for easy mobility and on demand operations 	
ERASURE		REPORTING	
<ul style="list-style-type: none"> Certified for use with Windows 10, 8.1, 8, 7, Vista, and XP Erase all kinds of files such as from programs like Excel, Word and PowerPoint Overwrite selected files (including previous versions stored by Windows), free disk space, temporary files and the recycle bin Instantly erase files via drag and drop from the desktop to Blanco File Erase files and folders on the local computer Remotely execute secure erasure of files and folders on servers and in storage areas across the network Supports all global data 		<ul style="list-style-type: none"> Reports ensure compliance with standards and legislation like PCI DSS requiring deletion of file level data Centralized, digitally-signed and tamper-proof report options Detailed PDF or CSV reports for easy viewing and XML files for centralized reporting Full support for the Windows event log Add custom fields in reports according to process requirements Detailed reporting includes everything needed for compliance such as security information, user data, file names and exact times Reports sent automatically to Blanco Management Console as soon as the computer is online in the network 	
SUPPORTED PLATFORMS		LANGUAGE SUPPORT	AUDITING
<ul style="list-style-type: none"> Windows 8, 7, Vista, XP Windows Server 2012, 2008, and 2003 HP-UX 11.31 with VxFS AIX 5.1 or later with JFS or JFS2 Solaris under special circumstances 32- and 64-bit platforms for all supported OS 		<ul style="list-style-type: none"> English, French, Spanish, German and Japanese <p>Please ask your Blanco sales representative for details.</p>	<ul style="list-style-type: none"> Full integration with Blanco Management Console for detailed auditing and control to ensure full compliance
