

Blanco Mobile Insurance

Maximize customer lifetime value with our accurate enrollment process & fraud detection—
at any point in the customer lifecycle

This customer-facing app or web browser solution remotely identifies and assesses device condition so you can offer the best coverage options in as little as a few seconds.

90% of customers leave mobile retail stores without device insurance, creating an opportunity for you to offer at-home, on-device mobile insurance solutions and increase profits.

Prevent fraudulent insurance claims by confirming the condition of mobile devices remotely with a trusted, configurable app customers can access anywhere.

Key Benefits

- Identify and assess device condition prior to offering coverage.
- Allow customers to purchase insurance anywhere, any time with an easy-to-use app or through a web browser.
- Perform accurate claim validation/fraud detection.
- Configure your unique set of automated and assisted diagnostic tests, including: screen quality tests, physical damage and lost/stolen checks.
- Enable remote device condition assessment with automated and assisted tests.
- Update real time insurance plan quotes on the fly.
- Remove human error with objective device assessments.
- Provide a variety of insurance purchase options, based on your unique requirements.
- Integrate with an existing app via our SDK or create a new, customized white-label solution.
